

Helping customers achieve
Sustainable Security Solutions.

Our Mission

The EITS mission is “To understand each of our customers’ unique needs, guide them toward the right security investments, and provide the best possible professional services to defend their people and data.”

Our People

EITS believes the key to maximizing security investments is the right professional services (PEOPLE) supporting the assessment, design, deployment, and long-term enablement. EITS puts a heavy focus on manufacturers’ certifications in order to deploy best-of-breed security solutions across the industry. It is the people who make the difference when it comes to any product or service, and our mission is to ensure we have the right people to best enable our customers’ security programs.

What We Do

Security - we “do” security, and we do it well. For the technically minded, following SANS Controls provides a solid foundation for a secure infrastructure. Our service offerings align and address these controls, ensuring a cohesive all encompassing solution that is not only achievable, but sustainable. Below is a list of our service offerings:

- Asset & Application Inventory
- Assessment & Enablement
- Incident Response
- Pen Testing & Red Team Exercises
- Application Security
- SOAR: Security Orchestration, Automation, and Response
- Endpoint Protection
- Vulnerability & Patch Management
- Network Segmentation & Inspection
- Firewall Health Check
- Prevent Insider Threat
- SIEM (Security Info. & Event Management) / MDR (Managed Detection Response)
- Configurations Security Standards
- Email / Web Browser Protection
- Identity & Access Management
- Data Protection & Recovery

Our Partner Network
