

# Varonis Managed Services

**Data risk governance** that enables your organization to take control of your sensitive data to **reduce data risks, compliance scopes, and unauthorized access.**

## DatAdvantage – Protect Your Data Where it Lives

Varonis DatAdvantage gives you the power to visualize your blast radius, audit and search billions of events, and effectively model and commit changes to reduce risk.

<b>Occurance</b>	<b>Service Provided</b>
Bi-Monthly	EITS reviews all privileged accounts and refines access as needed.

## Data Classification – Go Beyond Mere Classification

Robust classification automation of sensitive files with insights into high concentrations of sensitive data locations. Always know who is accessing, changing, deleting, or sharing sensitive data to ensure that permission policies are up to date, thereby reducing your exposure.

<b>Occurance</b>	<b>Service Provided</b>
Monthly	Fine-Tune the Data Classification Rules to Reduce False Positives
Weekly	Provide Health Check on Scan Progress
Bi-Weekly	Analyze Sensitive Data Results via DA Work Area with Customer
Monthly	Help Customer Develop Custom reports to Action Results of DCE Scans
Quarterly	Perform and Present Post Remediation Data Risk Assessment Document

## DatAlert – Data-centric user behavior analytics

Detect, prevent, and reduce the number of false positives to achieve an accurate account of your vulnerabilities. The DatAlert A.I. unobtrusively collects events and learns your users' behavior for powerful automated response and intervention control to stop attacks and limit the damage.

<b>Occurance</b>	<b>Service Provided</b>
Monthly	Meet with stakeholders to review alerts and needed remediation
Monthly	Fine tuning of the DatAlert rules to reduce false positives
Quarterly	Customized rules created to fit your unique needs

## Automation Engine – Automate Data Protection

Safely remediate open access across your corporate file systems in days, not years. Automation Engine runs silently in the background to enforce zero trust as users continue to create and share data. Eliminate open access and avoid privacy violations resulting in a reduced attack surface.

<b>Occurance</b>	<b>Service Provided</b>
Monthly	Create and execute up to 16 Broken Permissions Repair rules
Monthly	Create and execute up to 16 Removal of Global Access Groups Rules
Quarterly	Perform and present post-remediation Data Risk Assessment document

# Agile Management Options

Adaptable data management solutions *designed to meet your immediate needs*

## Both plans include:

### All Products – Keep Your Varonis Investments Optimized
